SUMMARY

Third-year B.Tech Computer Science student with strong foundations in Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, and OOP. Experienced in building scalable backend systems, REST APIs, and distributed applications using Node.js, PostgreSQL, Redis, and Docker.

EDUCATION

Jaypee Institute Of Information Technology, Noida 62

2023 - 2027

B.Tech - Computer Science and Engineering

CGPA: 8.92

Delhi Public School Ghaziabad Vasundhara

Class 12th, CBSE Board (PCM + CS), 2023

96%

Class 10th, CBSE Board, 2021

97%

SKILLS

Languages: C, C++, Python, JavaScript

Core CS: DSA, Operating Systems, DBMS, Computer Networks, OOP

Backend : Node.js, Express.js, Flask, REST APIs

Databases: MySQL, PostgreSQL, Firebase, SQLite

Tools: Git, GitHub, Docker, Postman, VS Code

Frontend: React.js, HTML, CSS

EXPERIENCE

- **Software Development Intern** — Konvo (Saush Innovations Pvt. Ltd.) : Engineered scalable backend services and microservices using Node.js, PostgreSQL, and Redis; collaborated on backend services built with Spring Boot, developed secure REST APIs, and implemented concurrency-safe PostgreSQL transactions and JWT authentication.
- **Data Science Intern** — Unified Mentor : Performed data preprocessing, EDA, feature engineering, and visualization using Python, Pandas, and Power BI for data-driven insights.

PROJECTS

QueryMind — Next.js, Node.js, Express.js, PostgreSQL, pgvector, Redis, BullMQ, Docker

[Demo](#) | [GitHub](#)

Designed and developed an AI-powered analytics platform that converts natural language into production-safe SQL using RAG-based schema retrieval, SQL validation, and feedback-driven query optimization.

Paid Media Locker — React.js, Node.js, Express.js, PostgreSQL, Prisma, Docker

[GitHub](#)

Built a secure content monetization platform with JWT authentication, PostgreSQL transactions, S3-based storage, and row-level locking to prevent race conditions.

Candidate Data Transformer — Python, Pydantic, pytest

[GitHub](#)

Built a deterministic data transformation pipeline using graph-based identity matching, schema validation, and configurable runtime projections to unify candidate data into a canonical schema.

ACHIEVEMENTS

- Qualified Internal College round of **Smart India Hackathon (SIH 2024)** with project **MedBedCare (1620)**.
- Solved 500+ DSA problems across LeetCode, CodeChef, Codeforces, and GeeksforGeeks.

CERTIFICATIONS

- Certification for completion of **GfG 160 - 160 Days of Problem Solving** — GeeksforGeeks

Jun 2025

- **Deloitte Australia Virtual Job Simulation** — Forage

Jun 2025
